

## Guide for Application

Research institutions and companies are entitled to apply for funding of research projects from every field of power plant technology at every time.

Applications shall be submitted as a file and shall comprise the following specifications:

- ⇒ Topic
- ⇒ Data of the applicant and as the case may be of further research institutions involved (company/institution, address, contact person, phone, fax, e-mail),
- ⇒ Data of the project manager (if deviating from the applicant),
- ⇒ Project description, structured as follows:
  1. Description of the problem to be solved,
  2. Benefit(s) for VGB's member companies,
  3. State of the art (bibliographical references),
  4. Goal(s),
  5. Approach to the problem and working steps,
  6. Abstract (maximum one page),
- ⇒ Time Schedule,
- ⇒ Financing scheme, divided in
  - Staff costs, equipment costs, material costs, overhead, other costs (travel costs ...)
  - Other financing resources (as the case may be),
  - Scheduled instalments,
- ⇒ Date of application.

The evaluation of the application is made by VGB Offices. This comprises the technical assessment by one of the VGB technical committees, which may discuss the project with the applicant and the identification of financing options (possibly an application for public funding).

The applicant will receive an acknowledgement of receipt and a notification of the evaluation results. The evaluation process is subject to the meeting dates of the committees and therefore may take about six months.
