CONTENTS

1 Introduction ... 9

1.1 Scope ... 9
1.2 Responsibilities ... 10
1.3 Standards, guidelines and codes ... 10
1.4 Terms and definitions ... 11
1.4.1 Terms relating to the safety concept ... 11
1.4.2 Terms relating to maintenance ... 12
1.4.3 Terms relating to ageing ... 13
1.4.4 Other terms ... 13

2 Lifecycle management ... 14

2.1 Conceptual ageing ... 14
2.2 Technological ageing ... 15
2.3 Ageing of construction materials ... 15
2.3.1 Concrete corrosion ... 15
2.3.2 Reinforcement corrosion ... 16
2.3.3 Surface protection systems ... 17
2.3.4 Seals ... 17
2.3.5 Joint ribbons ... 17
2.3.6 Steel mounting parts ... 18
2.3.7 Crack formation ... 18
2.3.8 Possible damage mechanisms in components ... 18

3 Maintenance ... 20

3.1 General ... 20
3.2 Components ... 20

4 Servicing ... 21

4.1 General ... 21
4.2 Documentation ... 22

5 Inspection ... 22

5.1 General ... 22
5.2 Nature and scope of the inspections ... 23

5.2.1 Minor inspection 23
5.2.2 Major inspection 23
5.2.3 Special inspection 24
5.3 Metrological monitoring 25
5.3.1 Objective of construction monitoring 25
5.3.2 Settlement differences 25
5.3.3 Wind 25
5.3.4 Temperature 26
5.3.5 Condensate 26
5.3.6 Material properties 26
5.3.7 Concrete erosion on the inside of the shell 27
5.3.8 Further metrological monitoring 27
5.3.9 Documentation and interpretation 27

6 Repairs and improvements 27

6.1 Planning 28
6.2 Implementation 28
6.3 Materials 29
6.4 Special requirements for flue gas discharge 30
6.5 Documentation 30

7 Dismantling 30

8 Overall documentation - cooling tower registerbook 31

8.1 General 31
8.2 Documentation for new construction projects 32
8.2.1 Master data 32
8.2.2 Design and planning data 32
8.2.3 Documents after final documentation 32
8.2.4 Final documentation 32
8.2.5 Constructional provisions for operation of the cooling tower 32
8.3 Subsequent documentation for existing cooling towers 33
8.3.1 Compilation of the available documents 33
8.3.2 Condition registration 33
8.3.3 Assessment of the structural condition 33
8.4 New circumstances 34

APPENDICES Ageing mechanisms of construction materials 35

A1 Concrete corrosion 35

A2 Reinforcement corrosion 36

A3 Surface protection systems 37

A4 Seals..... 38

A5 Joint ribbons 39

A6 Steel mounting parts 39

A7 Crack formation 40
