## Electricity Generation - Facts and Figures

The update of the information brochure "Electricity Generation - Facts and Figures" edition 2020/2021 had been published. Periodically, since 2003 this VGB publication informs about facts and trend in electricity generation.

The topics of the actual issue are:

- Electricity demand Worldwide and in Europe
- Renewables (RES) in the EU - EU'S ambitious targets for 2020
- Hydro power - an indispensable source of energy
- Wind energy - a mainstay of the energy transition
- Biomass - the all-rounder
- Distributed power - new supply system structures
- Storage technologies - an important component of system stability
- Flexible generation - guaranteeing security of supply
- New framework for the operation of conventional power plants
- Nuclear power: continued expansion worldwide
- Nuclear power: plants, planned shutdowns, new plants and projects
- Small Modular Reactors (SMR)
- Decommissioning
- New power generation capacities required
- Planned and announced new construction projects in Europe
- Global Climate Policy Needed

The edition 2020/2021 as also former editions are available for download (see below) in English and German language now. You can order the printed version in the [VGB shop](#). Single copies are available for free.
