

Catalogue of HYDROPOWER Events in Europe 2019-2020

Veranstaltungskalender für WASSERKRAFT in Europa 2019-2020

... is the first address in techno-economic and environmental issues and functions as the collective European platform and key representative for hydropower community.

February 2019

Exchanging knowledge > Generating solutions

Catalogue of hydropower events in Europe 2019-2020

The catalogue of hydropower events jointly published by VGB and eurelectric includes event information about conferences, symposiums, seminars, workshops and committees (exclusively committees of VGB and eurelectric) in Europe among others related to

- engineering,
- construction and commissioning,
- operation and maintenance,
- ecology and fish protection and
- legal frameworks.

In case you are hosting or come across an event that is not listed here or require any changes please send us the information to one of the contacts listed below.

Veranstaltungskalender für Wasserkraft in Europa 2019-2020

Der gemeinsam von VGB und eurelectric publizierte Wasserkraft Veranstaltungskalender enthält Veranstaltungshinweise zu Konferenzen, Symposien, Seminaren, Workshops und Gremiensitzungen (ausschließlich Gremien von VGB und eurelectric) in Europa unter anderem mit dem Kontext zu

- Auslegung, Design und Planung,
- Errichtung und Inbetriebnahme,
- Betrieb und Instandhaltung,
- Ökologie und Fischschutz und
- rechtlichen Rahmenbedingungen.

Falls Ihre oder weitere Veranstaltungen in den Kalender aufgenommen oder Änderungen vorgenommen werden sollen, ersuchen wir um Übermittlung an eine der genannten Kontaktadressen.

eurelectric is the sector association which represents the common interests of the electricity industry at pan-European level, plus its affiliates and associates on several other continents.

eurelectric's mission is to contribute to the development and competitiveness of the electricity industry, to provide effective representation for the industry in public affairs and to promote the role of a low-carbon electricity mix in the advancement of society.

VGB PowerTech e.V. is the International Technical Association for Generation and Storage of Power and Heat and represents all generation technologies. VGB's technological field "Hydro" provides Europe's largest platform for hydropower operators, as well as for hydropower equipment manufacturers and service providers of hydro-electric facilities.

Currently, the association represents 74 hydropower operators from 19 countries representing an installed capacity of more than 64,000 MW and 33 European hydropower equipment manufacturers. At present, more than 100 experts are actively participating in the numerous committees and groups dealing with all technological, operational and environmental aspects of hydropower plants.

Benefit from our comprehensive offer as a member of our powerful hydropower network.

Enhancing cooperation between eurelectric and VGB to strengthen the position of hydropower in Europe

VGB and eurelectric have committed to jointly increase their efforts to advocate European policymakers to recognise the important role of hydropower in the European power system including the multipurpose function of hydro infrastructure. The comprehensive expertise of the two associations will provide the basis to ensure proper representation of hydropower at the European level, with eurelectric focussing on the political advocacy and VGB providing technical analysis and research.
