TO RECEIVE MORE ATTENTION FOR YOUR
ACTIVITIES IN THE HYDROPOWER SECTOR**

VGB PowerTech | Hydro

... is the first address in techno-economic and environmental issues and functions as the collective European platform and the key representative for hydropower community.

Exchanging knowledge > Generating solutions

VGB Expert Event

Digitalization in Hydropower 2020

"Implemented Innovative Digital Measures, Products and Tools"

Enhanced digital controls can contribute to improving the performance of hydropower fleets, plants and equipment by reducing costs and optimising asset management. Digital control systems can also play a major role in improving decision-making and supporting operations to work more efficiently. The fact that a growing number of the world's hydropower plants need to be refurbished and modernised in the next few years makes the transformation process highly challenging.

The workshop will bring together experts from leading operators, manufacturers and suppliers as well as IoT companies together with related stakeholders to discuss challenges and opportunities for the operation of hydro power fleets accruing from digital transformation.

Technical University of Graz

Aula of the Technical University of Graz

Based on practical innovative digital measures the participants will gain insights on how digital solutions are already successfully implemented and applied. As a valuable complement to the lectures, all participants are invited to visit the Hydraulic Laboratory from the Institute of Hydraulic Engineering and Water Management at the Technical University of Graz.

Our VGB expert event is the ideal platform to acquire new customers and strengthen relations with existing ones. Sponsoring provides direct access to the decision-makers and qualified buyers in your target market.

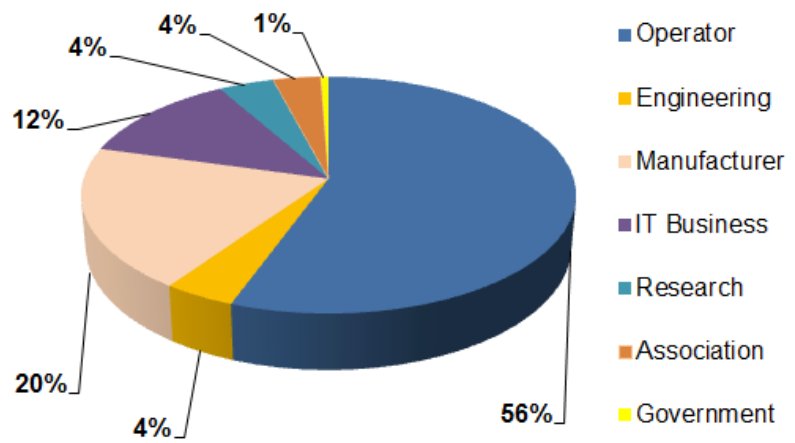

Excellent location for you at our exhibition

Located on the same floor as the aula, we are providing places for 8 exhibitions - four on each side of the aula doors. Every coffee break as well as the lunch will take place around the exhibition places, providing you with optimal conditions for the presentation of your company.

About the last event

Our last expert event on "Digitalization in Hydropower" took place in Graz on 25/26 April 2019 and was fully booked out with about 170 attendees. The focus of the event was set on experiences from implemented digital measures.

Sector	Partici-pants	Share
Operator	94	55%
Engineering	7	4%
Manufacturer	33	20%
IT Business	21	12%
Research	7	4%
Association	6	4%
Government	1	1%
Total	169	100%

Sponsorship Package for Non VGB member ... 300 € + VAT

Sponsorship Package for VGB member ... 220 € + VAT

Who is

VGB PowerTech e.V. (VGB) – as the international technical association for generation and storage of power and heat – is intensifying its activities in the field of hydropower. As a result an expanded focus regarding techno-economic, ecological and energy policy aspects is taken into account to manage the forthcoming challenges.

VGB PowerTech | Hydro's mission is:

- **Performing as the collective European platform for operators, manufacturers and suppliers of hydropower plants.**
- **Being the first address for interested parties in techno-economic, ecological and strategic challenges concerning hydropower.**
- **Functioning as information platform for the hydropower community in Europe.**

To become the collective European information platform of hydropower, VGB PowerTech | Hydro is strengthening the co-operation with eurelectric, with several national associations and with the hydro-equipment suppliers in order to promote the position of hydropower in Europe. The comprehensive expertise within VGB PowerTech | Hydro and of these co-operations will form the basis to represent the common interests of all hydropower stakeholders (operators, hydro-equipment manufacturers and service providers of hydroelectric facilities) on a European level.

Benefit from our comprehensive offers and profit from the successful network as member.

Further impressions of the activities, services and offers of VGB PowerTech | Hydro are available in the free download area, e.g.

- **VGB Hydropower General Presentation** (strategies – main topics – current activities)
- **Hydropower Fact Sheets** (Facts and figures about hydropower in Europe)
