VGB Technical Services now part of the organisational structure of VGB PowerTech Service GmbH

- **New structure of technical service of the VGB Group**
- **Comprehensive expertise and portfolio covering oil lab, supervision of construction and assembly materials lab and water chemistry as well as engineering consultancy**

Essen. As of January 1, 2018, the “Technical Services” of the VGB Group are part of the organisational structure of VGB PowerTech Service GmbH. The portfolio of the VGB Group for electricity and heat generation as well as storage covers the fields of supervision of construction and assembly, materials lab, water chemistry and oil lab of the Department “Technical Services” and engineering consultancy offered by “VGB PowerTech e.V.”.

The expertise appreciated by customers and the close cooperation among the activities of the VGB Group with their synergies will be maintained and extended.

Christian Ullrich will remain head the “VGB Technical Services”. The same applies to Dr Oliver Then, who will also continue to be in charge of “Engineering Consultancy” within the VGB Group.

VGB PowerTech e.V., based in Essen, is the international technical association for the generation and storage of power and heat. Its some 450 members from 33 countries represent an electricity generating capacity of 435,000 MW. The Technical Services of VGB PowerTech Service GmbH as well as engineering consultancy are an integral part of the VGB Group’s activities covering important topics of supervision of construction and assembly, materials lab and water chemistry as well as oil lab and engineering consultancy. VGB bundles technical competencies and services in the fields of engineering, operation, environmental and climate protection as well as operation and maintenance management for all types of electricity generation and storage.
